E. TRAVIS.

[um 1915]

Here comes the train.

Special vans for carrying pigeons are now run by railway companies. This picture shows the interior of one of the Midland Company's pigeon vans.

Letting the Pigeons out to fly home again as fast as they can.

The nursery engine.

Arrival and despatch of a ship's cargo.

A School Treat.

An express on the  
North Eastern Railway.

An  
Engine  
on a  
Ceylon  
Railway.

One of the latest engines on the Western Railway  
of France.

The New York Central Electric Motor.

So as to avoid the smoke from engines in New York, city trains are hauled by electric locomotives, (of which the above is an illustration) from a point of about 25 miles outside the New York terminus. These locomotives are very powerful and can develop the enormous energy of some 4,000 horse power.

The Engine's  
"Wash and brush up."

Watching for Daddy's train.

Awkward Passengers.

Cattle on the Quay, waiting for their Boat.

Unloading the Mails.  
How letters arrive from America.

Showing a Post-bag slung  
ready to be caught up by  
the express train. The train  
catches the bag into the  
net as it passes at full  
speed.

How coals are shot  
into the tender of an Engine.

Men at work  
on the line.

A Giant crane which can lift a whole truck of coal,  
weighing 10 to 15 tons.

One of the latest engines of the Caledonian Railway.
